

BALLPOINT PEN

MADE IN JAPAN

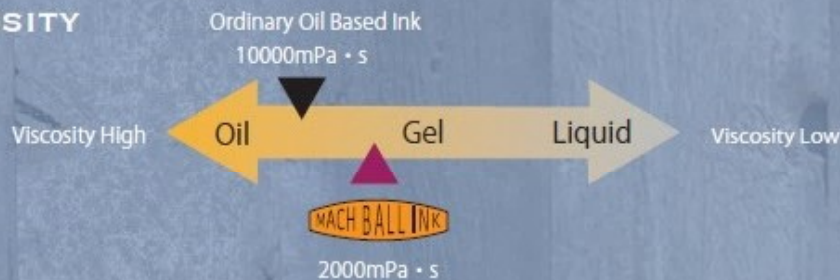

SECRET OF "SMOOTH WRITING FEEL"

Apply for all Anterique Ballpoint Pens

1. MACH BALL INK

INK VISCOSITY

The tip ball rotation is smoother with MACH low viscosity ink, processing lower writing friction. Compared with standard oil based ball point pens, light and smooth writing experience is provided.

2. SUPER PRECISION SPRING TIP

Inside of the ball tip

For the ball-point pens with low viscosity ink, precision ball tips are definitely required. Otherwise, ink can be leaked easily and it could cause serious problems. All Anterique's ball-point pens are equipped with super precision "spring tip," which control the perfect ink flow and prevent from ink leakage.

Even very small, invisible parts of ball-point pens, these are "The Secret" for why Anterique ball-point pens write so comfortable!
